# No matter how high you want to go...

...we'll keep you safe!

Do you know that feeling? You wake up in the middle of the night from a dream and think: **I must not forget this one!** – and the next morning, it's gone.

Our new RAID superstars can't save your dreams: **but pretty much everything else.**

We make sure that **your hard work** and **brilliant ideas** are in the best hands – or in our case, hard drives.

# More is better

You see the pattern?

We've got two of so many things: eyes, ears, hands... so why would you put all your trust in just **ONE** hard drive? Meet **IB-RD2253-C31**: thanks to **RAID 1**, **your data is backed up twice**. Even if one drive fails, your project keeps going.

And if you're more of a 'speed' speed enthusiast: **RAID 0** squeezes every bit of performance out of your SSDs with a **baffling 10 Gbps**. **Quiet, compact, reliable.**

# Big projects, peace of mind

That's what the "workhorses" are built for.

The cameras stop rolling, the shoot is done: now **terabytes of raw data need to be safely stored**. In the past, that meant sweating, sorting, and hoping everything arrived intact.

With the **IB-RD3620SU3** and **IB-RD3621U3**, things get a lot more relaxed: whether you focus on speed with **RAID 0** or prefer to play it safe with **RAID 1** – our systems reliably take care of your data in the background.
